Experience

Software Engineer Intern | Innov2Grow – Bengaluru, Karnataka

Dec 2025 – Mar 2026

- Developed client-facing web applications using **Next.js, React.js, Node.js, Express.js, PostgreSQL, and Supabase**.
- Designed and integrated **RESTful APIs, authentication workflows, and database operations** using Node.js and Express.js.
- Built reusable frontend components and integrated backend services to support application features.
- Implemented **Redis caching, API rate limiting, and a message queue-based notification system** to improve backend performance and asynchronous processing.

Full-Stack Developer | C4GT

Aug 2025 – Present

- Contributed to **Local Hunt**, a collaborative full-stack project, through feature development, API integration, and testing.
- Built application features using **Next.js, TypeScript, REST APIs, and Supabase**.

Projects

TalentPath – Full-Stack EdTech & Career Preparation Platform

[Live Demo](#) | [GitHub](#)

- Built a full-stack career preparation platform combining **DSA practice, coding contests, aptitude tests, jobs, roadmaps, and progress tracking** in a unified platform.
- Developed an online coding compiler supporting **Python, JavaScript, Java, C, and C++**, with automated evaluation and contest functionality.
- Implemented an **ATS Resume Checker** with job-description matching, resume scoring, targeted improvement suggestions, and activity-based dashboard recommendations.
- Improved backend performance using **Redis caching, API rate limiting, pagination, and infinite scrolling** for efficient handling of user requests and large datasets.

RSD Education – AP DSC SGT Exam Preparation Platform

[Live Demo](#) | [GitHub](#)

- Built a high-concurrency **CBT exam preparation platform** with adaptive practice, 160-question mock tests, performance analytics, subscriptions, and dedicated English/Telugu learning tracks.
- Developed an **intelligent question-selection engine** using attempt history, weak-topic detection, priority scoring, and topic-balanced selection instead of inefficient random SQL queries.
- Optimized question delivery using **PostgreSQL filtering, two-pass data loading, Redis caching, cache warming, versioned invalidation, and cache-stampede prevention**.
- Implemented **distributed rate limiting, secure answer-key handling, and role-based admin controls** for question management, mock generation, bulk CSV updates, and payment reconciliation.

Education

Kakinada Institute of Engineering and Technology (KIET) — B.Tech in Artificial Intelligence and Data Science (AIDS) | CGPA: 7.30/10

2023 – 2027

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication, Rate Limiting, Caching, Message Queues

Databases: PostgreSQL, MongoDB, Supabase, Redis

Core CS: Operating Systems, DBMS, Computer Networks, OOP

Tools: Git, GitHub, Postman, Vercel

Achievements

- Solved **400+ DSA problems** across LeetCode, GeeksforGeeks, and Coding Ninjas; secured **18th Rank** on the GeeksforGeeks Institute Leaderboard at KIET.
